SUMMARY

Full-Stack Developer focused on building production-ready web applications with Next.js, React, TypeScript, and modern backend technologies. Experienced in developing authentication systems, database-driven applications, REST APIs, and deploying applications to production. Currently expanding into AI and machine learning with Python, NumPy, and Pandas, with a focus on integrating intelligent features into real-world software.

SKILLS

- | | |
|--------------------|----------------|
| • React.js | • Next.js |
| • Node.js | • MongoDB |
| • PostgreSQL | • Python |
| • Machine Learning | • Git & GitHub |

PROJECTS

BarhtaFit

Full-Stack Developer

- Built and deployed a full-stack fitness application for creating workouts, logging training sessions, and tracking workout progress.
- Developed secure JWT-based authentication with HTTP-only cookies and user-level authorisation to protect private workout and session data.
- Built REST API endpoints and integrated MongoDB for workouts, exercises, users, and training sessions.
- Implemented exercise search and filtering, progress dashboards, protected routes, and role-based admin functionality.
- Deployed the application to production with a custom domain, Cloudflare DNS, and search-engine indexing.

Technologies: Next.js, TypeScript, Node.js, MongoDB, Mongoose, Tailwind CSS, JWT, Vercel

EDUCATION

Fsc - Computer Science

Al-Muslim School and College Charsadda

COURSES

Artificial Intelligence & Machine Learning

Ali Khan Digital Acadmy Charsadda

Practical training in Python programming, data analysis, machine learning fundamentals, database integration, and object-oriented programming through hands-on projects.
